Earnings intelligence & valuation workbook companion

NSE: INFY | BSE: 500209 | Reviewed 2026-10-04 | Consolidated Ind AS

## What the latest results show

Q1FY27 ended 2026-06-30: revenue of INR 48,211 crore and owner PAT of INR 7,769 crore. Derived EBITDA was INR 11,409 crore, with an EBITDA margin of 23.7%. Source: INFY-Q1FY27, statement of profit and loss, PDF page 3.

| Metric        | Q1FY27   | Q1FY26   | Change    |
|---------------|----------|----------|-----------|
| REVENUE       | 48,211.0 | 42,279.0 | 14.0 %    |
| EBITDA        | 11,409.0 | 9,943.0  | 14.7 %    |
| PAT           | 7,769.0  | 6,921.0  | 12.3 %    |
| EBIT MARGIN   | 21.1     | 20.8     | 25.9 bps  |
| EBITDA MARGIN | 23.7     | 23.5     | 14.7 bps  |
| PAT MARGIN    | 16.1     | 16.4     | -25.5 bps |

Interpretation: compare revenue growth with profitability and cash collection. These mechanical deviations identify review priorities; they do not establish a beat or miss against consensus. No consensus feed or live market price is connected.

## Annual financial record

| INR crore unless noted     | FY24    | FY25    | FY26    |
|----------------------------|---------|---------|---------|
| Revenue                    | 153,670 | 162,990 | 178,650 |
| Derived EBITDA             | 36,425  | 39,236  | 40,991  |
| Owner PAT                  | 26,233  | 26,713  | 29,440  |
| ROE (%)                    | N/A     | 29.0    | 31.2    |
| ROCE (%)                   | N/A     | 33.6    | 34.4    |
| Operating cash flow        | 25,210  | 35,694  | 33,986  |
| Reported cash capex        | 2,201   | 2,237   | 2,727   |
| Accounting working capital | 50,638  | 54,249  | 51,167  |

Sources: INFY-FY25 and INFY-FY26. FY26 includes an exceptional INR 1,289 crore labour-code expense. FY26 capex is reported net of sale proceeds; comparative labeling differs. Missing ROE/ROCE require an opening balance sheet and are not filled with guesses.

# Valuation: three explicit scenarios

Five-year annual FCFF model using FY26 reported revenue and fiscal year-end balance sheet. INR per ordinary share.

| Assumption / output      | Bear  | Base  | Bull  |
|--------------------------|-------|-------|-------|
| Revenue growth (%)       | 4.0   | 8.0   | 12.0  |
| EBIT margin (%)          | 18.0  | 21.0  | 23.0  |
| WACC (%)                 | 12.5  | 11.0  | 10.0  |
| Terminal growth (%)      | 3.5   | 4.0   | 4.5   |
| P/E assumption (x)       | 18.0  | 23.0  | 28.0  |
| EV/EBITDA assumption (x) | 12.0  | 16.0  | 20.0  |
| DCF value / share        | 659   | 1,124 | 1,817 |
| P/E value / share        | 1,309 | 1,673 | 2,037 |
| EV/EBITDA value / share  | 1,220 | 1,894 | 2,634 |

All scenario inputs are illustrative analyst assumptions, not company guidance, observed peer multiples or a recommendation. P/E uses reported annual owner PAT. EV/EBITDA uses first forecast-year derived EBITDA. No percentage upside is shown without an independently dated market quote.

## Base-case cash-flow model

| Year | Revenue | NOPAT  | D&A   | Capex  | Change WC | FCFF   |
|------|---------|--------|-------|--------|-----------|--------|
| 1    | 192,942 | 29,983 | 5,788 | 7,718  | 2,573     | 25,481 |
| 2    | 208,377 | 32,382 | 6,251 | 8,335  | 2,778     | 27,520 |
| 3    | 225,048 | 34,972 | 6,751 | 9,002  | 3,001     | 29,721 |
| 4    | 243,051 | 37,770 | 7,292 | 9,722  | 3,241     | 32,099 |
| 5    | 262,495 | 40,792 | 7,875 | 10,500 | 3,500     | 34,667 |

Base enterprise value: INR 429,235 crore. Less net debt of INR -25,975 crore and minority interest of INR 445 crore gives equity value of INR 454,765 crore. Divided by 404.694 crore ordinary shares. Terminal value contributes 74.7% of enterprise value.

FCFF = EBIT x (1 - tax) + D&A; - capex - change in operating working capital. Operating WC is an assumed percentage of revenue; initial WC is normalized to the same ratio. Terminal reinvestment is recalculated at terminal growth. Cash bridge adds cash and current investments only, deducts lease liabilities and book minority interests. Lease treatment requires forecast capex to include ROU additions. Non-current investments are excluded conservatively.

## Model sensitivity and limitations

The app exposes both growth/margin and WACC/terminal-growth sensitivity grids. Terminal growth must remain below WACC. Stable margins and reinvestment ratios simplify a complex operating business; terminal-value concentration and share-count changes can materially alter value.

# Evidence, risks & reproducibility

## Governance coverage is incomplete

Keyword screening cannot establish governance quality. Read auditor opinions, related-party notes, litigation, pledges and exchange disclosures.

## Valuation inputs are analyst scenarios

WACC, growth, margins and valuation multiples are illustrative assumptions, not market consensus. No live market quote is supplied.

## Raw pdf fetch blocked

Infosys returned HTTP 403 to direct download. Snapshot contains reviewed primary-source numeric facts; snapshot hashes are not PDF hashes. Original PDFs remain linked.

## Exceptional item

FY26 reported PBT includes INR 1,289 crore labour-code expense. Historical figures are reported, not management-adjusted.

## Capex basis

FY26 and Q1 FY27 capex is net of sale proceeds; FY25 comparative statement labels expenditure without this qualifier. Treat FCF comparability with care.

## Coverage gaps

Sample quarter coverage is discontinuous. Q1 FY26 balance sheet and Q4 quarterly cash flows are missing; annual cash flow is never used as quarterly cash flow.

## Transcript notes

Bundled call search uses analyst paraphrases with PDF page anchors, not the complete copyrighted transcript.
